

The Qualitative Methods Master Class Webinar Series

Digital Tools for Qualitative Research

While most researchers know about and understand the benefits of qualitative data analysis software (QDAS) packages, fewer have thought about the ways new digital tools may impact every aspect of our work as researchers. In this webinar I will introduce participants to how both free and proprietary technologies can be used to support the entire qualitative research process, including: engaging in reflexivity, networking through social media, collaborating with colleagues, conducting paperless literature reviews, collecting data through mobile apps and from social media, creating a “hands-free” transcribing process, analyzing text and multi-media data, and new ways of writing and representing findings.
